ARYA KUMBHAR

Data Science & Full-Stack Engineer
Kolhapur, Maharashtra, India | aryakumbhar1508@gmail.com
linkedin.com/in/arya-kumbhar-764891308 | github.com/robot1508

PROFESSIONAL SUMMARY

B.Tech Computer Science & Data Science student (Expected 2028) with hands-on experience building full-stack web applications and SQL analytics pipelines using Python, JavaScript, React, PostgreSQL, and AWS Lambda. GSSoC 2026 Ambassador and Contributor with 40+ commits across open-source programs, and a strong foundation in REST APIs, relational database design, query optimization, and geospatial queries. Shortlisted for the AI for Bharat Program; Google Cloud & NVIDIA community member.

EDUCATION

D. Y. Patil College of Engineering & Technology (DYPCET), Kolhapur Expected 2028
Bachelor of Technology in Computer Science & Data Science

- Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Operating Systems, Computer Networks, Object-Oriented Programming

TECHNICAL SKILLS

Languages: Python, C++, SQL, JavaScript
Data Science & ML: Pandas, NumPy, Scikit-learn, XGBoost, Random Forest
Databases: PostgreSQL, Supabase, Firebase
Web & Backend: React, FastAPI, REST APIs
AI: LLM APIs, Prompt Engineering
Cloud & Tools: AWS Lambda, Google Cloud, Git, GitHub

EXPERIENCE

Internshala Student Partner | Internshala (Remote) Aug 2026 – Present

- Promote upskilling and career opportunities by encouraging student participation in online training and internship campaigns.
- Drive social media branding and community outreach to connect peers with professional resources and career pathways.

Contributor & Ambassador | GirlScript Summer of Code (GSSoC) 2026 Apr 2026 – Present

- Contribute features and bug fixes across multiple open-source repositories, with 5+ pull requests submitted through code review and merge workflows.
- Apply Git rebase strategies and GitHub CI/CD practices to streamline code review and integration.
- Mentor 8+ junior developers through technical discussions and code reviews as a program ambassador.

Open-Source Contributor | Elite Coders, Code Social, Open Source Connect Dec 2025 – Present

- Authored 15+ commits across 3+ open-source programs while following repository coding standards and contributing to technical documentation.
- Debugged JavaScript and Python issues using Git bisect and systematic stack-trace analysis; participated in code reviews.

Web Development Intern | Prodigy InfoTech Dec 2025 – Apr 2026

- Developed responsive React and Tailwind CSS components across 12+ web pages, ensuring cross-device compatibility.
- Translated UI/UX designs into pixel-accurate pages using semantic HTML, CSS media queries, and mobile-first development.
- Improved frontend performance with code splitting and lazy loading to reduce initial bundle load.

Management Coordinator & Team Member | Echo DYPCET & E-Cell DYPCET Sep 2025 – Present

- Co-organized 3+ campus-wide technical events (hackathons and talks) with 50+ student participants and industry speakers, managing end-to-end logistics.

PROJECTS

VoterSphere AI – Election Awareness Platform | github.com/Robot1508/votersphere-ai 2026

- Built an interactive, AI-powered platform to educate users about the election process, featuring a dashboard, gamified voter journey, and EVM simulation.
- Developed an AI-powered "Ask Constitution" assistant for civic Q&A during the PromptWars Hackathon (Google for Developers & Hack2skill).

Amazon E-Commerce Relational Schema & Analytics Pipeline Oct 2025 – Dec 2025
Technologies: *PostgreSQL, SQL, 3NF, CTEs, Window Functions, B-Tree Indexing*

- Designed a normalized 3NF relational schema for e-commerce workloads, prioritizing data integrity and scalable querying.
- Wrote analytical SQL using multi-table JOINs, CTEs, and window functions for reporting and business analysis.
- Implemented B-Tree indexes on foreign keys and frequently queried columns to improve query performance.

Swiggy On-Demand Food Delivery Analytics Platform Aug 2025 – Nov 2025

Technologies: *PostgreSQL, Python, SQL, Geospatial Queries, Geospatial Indexing*

- Built an analytical pipeline simulating order lifecycle and dispatch workflows using PostgreSQL and Python.
- Implemented Haversine distance calculations and geospatial SQL queries for delivery partner-to-restaurant proximity analysis.
- Automated aggregation workflows for delivery-time variance, order-volume trends, and restaurant-efficiency KPIs.

EcoBot – AI Sustainability Intelligence Engine Jul 2025 – Oct 2025

Technologies: *Python, LLM APIs, Prompt Orchestration, JSON, REST APIs*

- Built a multi-turn conversational AI engine that generates structured sustainability insights from user interactions.
- Implemented context caching and API payload handling for low-latency responses, with JSON parsing and schema validation for reliable data-pipeline integration.

FixItHub – Civic Issue Reporting & Tracking Platform Aug 2025 – Nov 2025

Technologies: *React, JavaScript, AWS Lambda, AWS Bedrock, Supabase PostgreSQL*

- Developed a full-stack civic engagement platform with geolocation tracking and real-time issue status updates.
- Designed a serverless backend with AWS Lambda and Supabase PostgreSQL for concurrent requests; added a B-Tree index on location_id to optimize location-based queries.
- Integrated AWS Bedrock (Claude 3.5 Sonnet) to cluster duplicate reports and analyze severity, with a weighted algorithm to prioritize issues by community impact; built with Team Akastski for the AI for Bharat Hackathon.

MediLocator – Real-Time Hospital Bed Availability System Jul 2025 – Sep 2025

Technologies: *HTML5, CSS3, JavaScript, Firebase Realtime Database*

- Developed a healthcare web application for locating nearby hospitals and viewing live bed availability.
- Implemented Haversine distance calculations for proximity-based hospital search; designed an accessible interface using ARIA labels and semantic HTML.

ACHIEVEMENTS & HACKATHONS

- AI for Bharat Hackathon (Hack2skill, AWS): shortlisted for the Prototype Development Phase with Team Akastski; built FixIt Hub.
- Ctrl+Space Hackathon, Oct 2025 (Newton School of Technology, ADYPU Pune; powered by Quantique Metadata): qualified for Round 3, shortlisted among fewer than 20 teams; completed the Idea Forge submission.
- Open-Source Programs: selected as Contributor for GSSoC 2026 (also Ambassador), NSoC 2026, and Open Source Connect Global 2026; completed Winter of Code Social 2025.
- PromptWars Hackathon (Google for Developers & Hack2skill): built VoterSphere AI.
- Webathon, TechFest-2K26 (Karmaveer Bhaurao Patil College of Engineering, Satara): earned Certificate of Appreciation in first offline hackathon.
- Dreamflow Buildathon 2025: launched a full-stack app under rapid-iteration constraints.
- Participant: Adobe University Hackathon 2026 (Round 1 online assessment), Tekron 2.0 CodeWars, TENET Hack 25, NationBuilding Case Study Competition 2026, and MLH Beginner Week.
- Competitive Programming: active on LeetCode, solving problems in arrays, graphs, and dynamic programming.

CERTIFICATIONS

- Salesforce Agentblazer Champion, Trailhead (Agentforce and AI agents)
- Tata: Data Visualisation – Empowering Business with Effective Insights, Job Simulation (Forage)
- AI Appreciate Badge – AI For All (CBSE & Intel)
- Google Cloud & NVIDIA Community Member, Google Developer Program (Jun 2026 – Present)
